SUGAR

Czarnikow, Maedougall & Co. port as follows on the sugar mark-under date of May 1: under date of May 1: Our last report was dated 24

April.

The activity of last week has beer followed by a pronounced bil, and the market has been in a state of stagn: tion since the date of our last report A contributing cause to the apath A contributing cause to the arathy of refiners was the heavy receipts of 65,663 tons, or 26,663 tons in excess of meltings, but a reaction of 3d, per ewt. In European beets had no doubt most to do with the pause in the demand here, for such movements it Europe, although they may be base almost entirely on paper transactions and not on sales of actual sugar, ger erally act as a check on both our ra

and refined markets. That the underlying conditions just tify a strong and active market is not disputed, and it is generally re-garded as certain that the presenduliness must roon give place to re-

duliness must soon give particular to the liquidation of speculative May accounts, which liquidation will soon run its course. To this has to be added the absence of demand from United Kingdom, where the Trade has followed a hand-to-mount policy for some time, owing to the possibility some time, owing to the possibility that in the forthcoming Budget the Chancellor of the Exchequer would place sagar once again on the free list. While this is possible, it is no looked upon as probable. Next were will see this question settled, Thursday, the control of t will see this question settled, Thursday, 7th, being the Budget day, What ever its appoundement as to sugar may be, there should be a buying ver its announcement as to sugar Abban Pant Coope any be, there should be a buying covernent in U. K. to make up deleted stocks.

There have been intermittent rains a some part of Cuba. While general inspection of Cuba. While general washing would interfere with the wear. movement in U. K. to make up de-

in some part of Cuba. While general rains would interfere with the reaping of the small balance of the present crop, they would be of great benefit to the growing canes upon which next season's result depend.

In some sections of this country and

in Great Britain unseasonable weather and frosts have done damage to the fruit crops. In this country, the damage done up to the present time is limited to comparatively small areas. and the general outlook is still good

European beet markets lost nearly the whole of the previous week's advance, but today's advices show some recovery and a firmer tone. F. o. b. quotations are: May, 11s, 194; June, 11s, 294; August, 11s, 194; June, 11s, 294; August, 11s, 194; August, 11s, 194; August, 11s, 194; August, 11s, 194; August, 11s, 195; A

January-March, 10s, 7½d.

The receipts for the week at the three Atlantic ports were 65,663 tons. REFINED.—Nothing of interest has transpired in the refined sugar market, where con-litious are practically unchanged for the week. Prices are held firm on previous basis of 5,40c., less 1 per cent for granulated. less 1 per cent, for granulated.

CUBA.-We have just received cable intimating that 35 centrals are grinding and that weather is showery. Receipts for the week at the three Atlantic ports, 65,653 tons. Meltings,

Willett & Gray's Sugar Trade Jour-nal of April 30 says of the raws sugar

VISIBLE SUPPLY.—Total stock of Europe and America, 3.148,651 tons, against 3,533,988 tons last year at the same uneven dates. The decrease of stock is 385,387 tons, against a de-crease of 387,102 tons last week. Total stocks and affonts (overhear show) tocks and affoats together show ; visible supply of 3,278,651 tons, against 3,628,988 tons last year, or a decrease of 350,337 tons. RAWS.—The week under review

and purchases for some time ahead, are not anxious about the future, which will take care of itself. As matter of fact, after a period of quietness more or less extended, and with possibly a comparatively slight decline me positions, considered in connection with the already large ad-vance, the buying must be resumed and include European purchases to extent of American qualities of beet sug ar available, because without such re newed supplies the present visible supplies, as compared with the requirements to September 1st. leave little or no stock in hand in the Unit-ed States at that date for September needs of refiners.

During this quiet period beet sugar in Europe has declined from the high est point of 11s. 1114d. f. o. b. Ham-burg to 11s. 84d., the parity of 4.47c.

for centrifugals, at the close For shipment to New York beet can probably be bought at 12s. 1½d. c. and f., the parity of 4.48c, for centrifugals In New York, centrifugals, 26 test have not changed in quotation on the spot, at 4.42c. per lb., duty paid. At the close, a sale was made at this

basis to American. For futures, May shipment was held for a while at 3%c, c, and f, asked, but later were offered at 3%c, without buyers,

Some business has been done this week in Javas for May-June shipment but particulars are withheld

The recent change is more in sen timent than in price, and will, event ually, pass away for reasons given.

The official news we have received by cable today from Cuba, as to weather, is that the long-continued drought is finally broken: "On different days of the week partial rains fell in provinces Camaguey, Santa Clara, Matanzas and Havana, but no

Harvesting is not delayed materially, and the rains are favorable for the next crop.

All that we need say is that the improvement in prices that must come later is delayed because of no actual requirements by refiners for a while to come, and is dependent largely on the demand for refined.

Buyers may or may not anticipate
